Software solutions for **better patient care management**

CarePort provides an end-to-end platform that bridges acute and post-acute EHRs. Our tailored software products allow providers, payers, and ACOs to clearly see the care that patients receive across multiple settings so that each can more efficiently and effectively coordinate care.

The CarePort suite of solutions:

CarePort Guide
Guide post-acute care selection and help patients choose high quality care

CarePort Connect
Manage patients across settings with real-time data and alerts

CarePort Insight
Evaluate patient outcome and post-acute provider performance

CarePort Transition
Streamline patient transitions to the appropriate next level of care

CarePort Care Management
Optimize discharge planning and utilization review with an EHR-agnostic, cloud-based solution

CarePort Referral Management
Track and respond to all patient referrals electronically in a single system

CarePort Interop
Identify and notify physicians and PACs of hospital admits, transfers, and discharges through the CarePort network

"The platform provides us with the **contextual information we need, in real-time,** to better monitor patient transitions across the continuum of care."

Bill Johnjulio, M.D. Chair, AHN Primary Care Institute and Medical Director, Physician Partners of Western Pennsylvania

Who we serve

Hospitals and health systems | ACOs and physician groups | Payers | Post-acute providers
